

A New Solution For Your Exam Needs

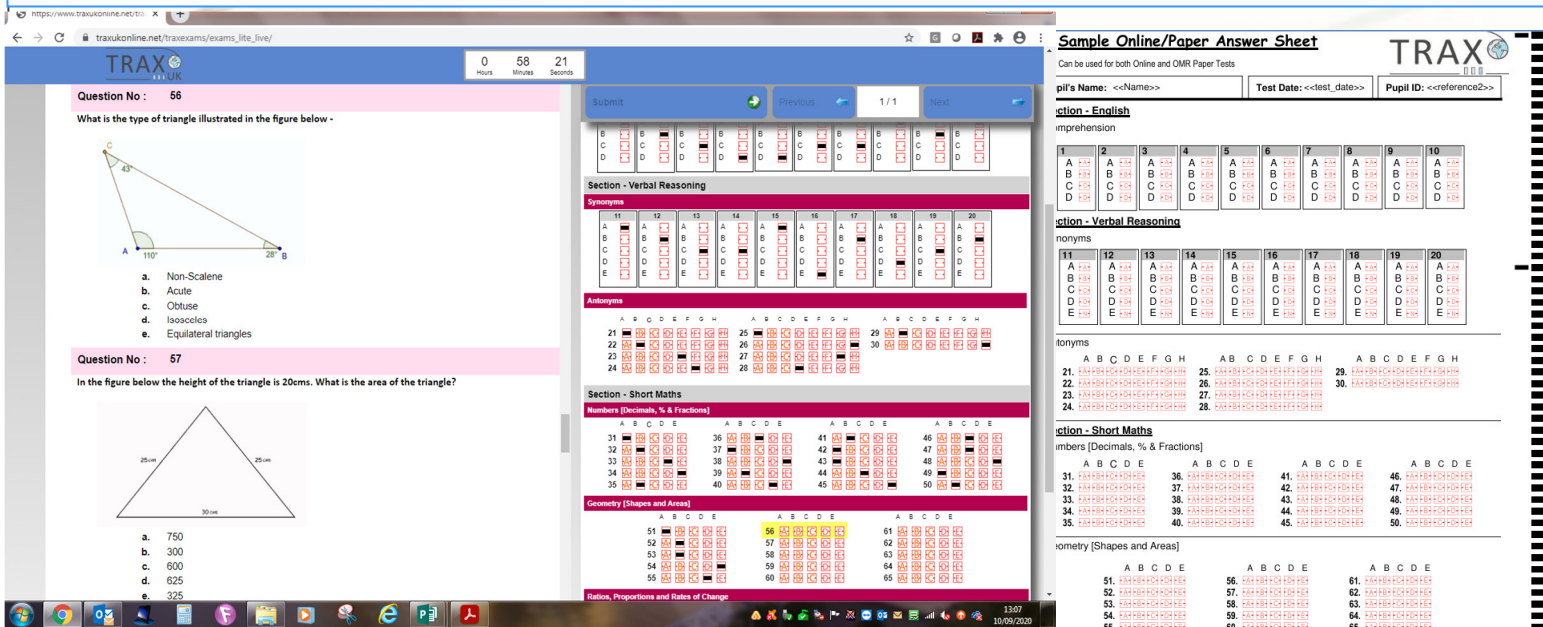

Online, Paper or Both Together! Trax UK are pleased to introduce a new approach to examination setting and marking. Based on a common platform, the system emulates the traditional paper approach online by displaying exactly the same format as a paper based examination with both the question paper and answer sheet shown side by side in an easily recognizable and familiar layout. Even the answer sheet structure is the same as the paper option and a candidate can, in the same way, answer questions in any order by simply clicking a box. Additionally dropdown, scripted and numeric answers are supported as well as the standard MCQ/EMQ/Multi-Select style questions.

Need to undertake a separate paper based exam or run both paper and online simultaneously? No problem! The system supports all of these scenarios using its unique 'design once - generate on any platform' technology.

Need invigilation/proctoring of your online exams, again no problem, we can offer a solution to meet your needs.

When combined with our powerful Question/Item Bank, the result is a seamless system capable of undertaking all types of examination, from Entrance tests through to advanced high stakes University and Vocational exams. Interested and want to know more, then why not contact us!

Today for Tomorrow's Future. Keep Safe.

The screenshot displays the Trax UK online exam interface. On the left, the 'Question Booklet' shows two questions: Question No. 56 asks for the type of triangle based on angles, and Question No. 57 asks for the area of a triangle with a height of 20cm. On the right, the 'Sample Online/Paper Answer Sheet' is visible, featuring a grid for marking answers (A-E) for various question numbers. The interface includes a timer (0:58:21), navigation buttons (Submit, Previous, Next), and a pupil information section.

Trax Question Bank Update

The latest version of the Trax Question/Item Bank has several new features including -

- * Linked text option to allow long scripts or instructions to be displayed/printed, ideal for questions where an article or extract needs to be included with full rich text option for linked text, questions and answers.
- * New copy question facility that can save to different structure/levels unlike new version mode that saves to existing level only.
- * Ability to check questions and answers when creating a new question list plus the inclusion of level headers in the draft list.
- * Ability to re-draft question lists before production, to merge or exclude section headers and shuffle questions between levels.

Trax Online Exams

With further restrictions now coming into force, online examinations are currently foremost in most organisations' mind. However, as well as considering the necessity for invigilation, another problem arises where a candidate/student disputes their marks and their choice of answers. The Trax Online system offers a leading edge audit trail solution that -

- Takes a screenshot of the candidate's answer sheet when the exam is submitted and stores it as an image.
- Allows an invigilator to see how/what has been answered.
- Has a full document management option to allow search and retrieval of individual answer sheets by the exam administrator that can be emailed/posted directly to candidates/students.
- Alleviates the problem relating to a burden of proof as the image replicates a scanned paper answer sheet.
